QualityConnectMD Software Allows Physicians to be More Efficient

Birmingham, AL -- November 19, 2002 – QualityConnectMD, a division of MedManagement, LLC, moved to the top of the Blue Cross/Blue Shield of Alabama Vendor Functionality Matrix for physician practice management software vendors.

The Vendor Functionality Matrix is a list Blue Cross/Blue Shield of Alabama publishes periodically to rank physician practice management software vendors and their ability to interact with BCBS of Alabama and InfoSolutions. Infosolutions is BCBS of Alabama's secure medical information network which allows physicians access to medical information which is vital for the ongoing treatment of patients.

The staff at QualityConnectMD has worked closely with BCBS of Alabama to ensure that the practice management software will not only allow a physician's office to schedule patients and track accounts receivable, but also interact with BCBS of Alabama and InfoSolutions to make the physician's day more efficient. The ability to view or print a BCBS of Alabama patient's medical history will help a physician make more informed decisions without ordering tests which may have been ordered previously, by another physician. Patients gain the benefit of a physician having the ability to view lab results, prescription information and other medical history from InfoSolutions so the patient is not required to carry copies of medical records from office to office.

According to Gary Glenn, CEO of MedManagement, LLC, "With such a large percentage of the patients in Alabama covered by BCBS of Alabama, we felt that our top priority was to have a software package that offered the best communication with BCBS of Alabama. Moving to the top of the Vendor Functionality Matrix is definitely a result of our commitment."

QualityConnectMD is based in Vestavia Hills, Alabama and offers practice management software to physician offices across the state of Alabama.
