Blue Cross and Blue Shield's New InfoSolutions e-Prescribing Service Fully Integrated with QualityConnectMD®

Birmingham, AL, January 26, 2005 – MedManagement, LLC announced today that QualityConnectMD, its state-of-the-art practice management system, is currently the only practice management system that is fully integrated with Blue Cross and Blue Shield's new InfoSolutions e-Prescribing service.

InfoSolutions e-Prescribing allows healthcare providers to utilize a Palm-OS compatible PDA to review medication history and refill or write prescriptions. Through collaboration with Blue Cross and Blue Shield, QualityConnectMD has made it possible for its clients to download their entire patient list to the PDA. This will enable providers to automatically write prescriptions for all patients without manually loading them to the PDA. Currently, clients of other vendors are limited in this application to just Blue Cross and Blue Shield and Medicaid patients.

"This is a huge advantage to QualityConnectMD providers because they can easily use this application to access all of their patients which should save practices time and money", according to Joan Ragsdale, COO of MedManagement, LLC.

The InfoSolutions e-Prescribing application is in production and is ready for download from the InfoSolutions website. InfoSolutions also provides access to patient medical records for participating hospitals and healthcare facilities. Questions about InfoSolutions and the new InfoSolutions e-Prescribing service may be addressed to Royce Bradley at Blue Cross and Blue Shield at (205) 220-5917. For questions about QualityConnectMD please contact Kim Mitchell at 205-970-8806 or 888-970-9720.

About MedManagement, LLC

MedManagement, LLC, founded in 1995, is a diversified healthcare company and a leader in providing medical practice solutions. In addition to offering QualityConnectMD, MedManagement offers QualitEscribe, a web-based Electronic Dictation Management System that reduces transcription costs and enhances productivity and accessibility through electronically stored notes. Contact Kim Mitchell at 205-970-8806 for a demo of QualityConnectMD or visit www.medmanagementllc.com for more information.
