

## Electronic Medical Records

QualityConnectMD Cardiology facilitates the move to Electronic Medical Records (EMR). Currently, QualityConnectMD Cardiology integrates with numerous EMR software systems guaranteeing the benefits of a strong practice management system while providing add-on EMR features that improve physician productivity and reduce overall costs.

Integration with an EMR product helps complete the revenue cycle by increasing accessibility to information required by the billing staff.

A good first step towards EMR is QualitEscribe, our Electronic Dictation Management System which provides the productivity-enhancing benefits of electronic storage, retrieval and accessibility of medical notes and letters.

"QualityConnectMD has saved us money on statements, letters and forms as well as staff time needed for processing. The integration of eligibility for Blue Cross and Medicare as well as claims status is a great feature for us. We are able to determine if a patient has coverage prior to the visit which helps our collection process. The auto postback of BCBS, Medicare and Medicaid is a huge time saver. There is more automation of billing, collections, statements and coding with this system than with others I have reviewed. We use the patient check-in module; therefore, I can keep a check on patient flow from my office."

Brooke Williams, CPA  
Practice Administrator

# QualitEscribe

## Electronic Dictation Management System

- Web-based dictation and transcription
- Electronic storage of notes
- Easy first step towards EMR
- Lower overall transcription costs
- No lost tapes or dictation
- Accessible by staff from any Internet-enabled PC
- Dictate from anywhere – hand held recorder increases mobility
- 24 hour turnaround
- Minimal upfront cost
- Meets HIPAA standards

QualityConnectMD Cardiology is a division of MedManagement, LLC, a leader in healthcare technology solutions

"Technical support is very important to us. The support we get from QualityConnectMD is the best - if we ever have a problem we speak directly to a support person and they're always courteous and helpful. We have the option of sending new employees to MedManagement to train which is a huge time-saver for us. The front desk especially likes the Scheduling Module which allows them to easily schedule multiple appointments."

A Practice Management  
System For Cardiology

# QualityConnectMD Cardiology

## Practice Management System

- Easier to Manage Patients
- Easier to Optimize Reimbursement
- Easier to Learn, Operate and Live With

QualityConnectMD Cardiology makes your life easier by offering special features that facilitate patient management while enhancing overall office productivity:

## Cardiology Patient Management

- Co-pay information is available in the system for easy access at check-in and check-out
- Ability to color code appointment status types to track patient flow through office from check-in to check-out
- Patient eligibility verification available from selected carriers
- Tracks patients with specific diagnoses who have not rescheduled
- HIPAA compliant “recalls” generated by system to notify patients to make appointments
- System displays patient schedule with balance due status
- Query module generates new patient and “no show” letters for patients and referring physicians
- Check-out module allows data entry for charges and payments at time of visit
- Claims processed same day of visit with no batching required which means quicker turnaround of claims for billing to patient

Electronic connectivity is increasingly important in today's fast-paced healthcare environment. QualityConnectMD's Electronic Data Interchange (EDI) solutions make it easier to optimize and speed reimbursement.

## Cardiology Electronic Data Interchange (EDI) Solutions

- Electronic claims filing and remittance posting available for hundreds of carriers
- Direct connectivity in some states at no cost
- Claims status and eligibility for certain carriers in some states is available from several locations within the software
- HL7 data exchange standards for clinical system connectivity
- Collection agency connectivity
- Satisfies all HIPAA standards
- Has the ability to correct the contract number or copay from remittance posting
- Interfaces with selected laboratories for transfer of demographics

## Other Special Features:

### Patient Demographics

- Flow of data entry is intuitive and easy to follow
- Allows users to search for patients in various ways including name, account number, contract number, social, phone number, date of birth and more
- Transcription can be accessed when clients subscribe to the QualitEscribe Electronic Dictation Management System

### Appointment Scheduling

- The “first available” appointment search cuts down on scheduling mistakes and overbooks
- Separate scheduling templates for each provider allow for variable appointment lengths for each appointment type
- View schedules by single provider, multiple providers, multiple days, etc.

### Tags and Flags

- Users can create and customize tags to track accounts for medical or financial purposes
- Tags can be used to stop scheduling or statements and to monitor and report collection accounts

### Claims

- The system archives insurance, allowing users to refile old dates of service to the correct insurance company
- The claims module walks users through the entire process of filing daily claims

- The system can print EOBs on demand and collate them with secondary insurance claims
- Eliminates the need to pull and copy EOBs

- Rejections reduced by pre-submission review of claims
- Can hold claims in suspense for refilling

### Remittance Posting

- Post payments by line item
- Checks the account number vs. the contract number
- Warns users if credit balance is created on account
- Payment reason codes are attached to each line item for easy reporting

### Refund Module

- Displays patient accounts with line item credits by dates of service and physician
- It's easy to move a patient into a refund request status
- Checks can be cut from the system

### Reporting

- Unlimited detailed reporting that should alleviate the need for generating manual reports from other software such as Excel
- Custom reports are available and easily generated

### Forms

- Superbills, patient demographic forms, and labels are printed from the system and can be modified at any time to add or remove information
- Custom letters can be created in the system eliminating outside printing costs

### Check Out Module

- Utilizes an on-screen version of the provider's superbill allowing front-desk staff to enter CPT and ICD-9 codes
- Generates a personalized patient receipt that includes charges, payment and follow-up appointment information

## Coding

- The system utilizes ALPHA II coding module to search and verify CPT and ICD-9 codes
- ALPHA II is electronically updated quarterly, eliminating the need to purchase coding books

## Unsurpassed Technical Support

- An on-line help desk can be accessed with the touch of one key from the user's keyboard
- This “chat-based” system allows the user to talk to a technical support representative without having to use the phone
- Clients always talk to a “live” support representative when calling by phone

## Training

- QualityConnectMD Cardiology is easy to learn and simple to use even for employees who have never used a Windows-based product
- Practice staff attend classes at MedManagement's Birmingham headquarters
- On the “go live” date, QualityConnectMD staff will be on-site to ensure a smooth transition

## Affordable Solution

- QualityConnectMD Cardiology is reasonably priced with upfront costs based on the number of providers in the practice
- Monthly technical support fees are based on the number of users

## Compare the Advantages of QualityConnectMD Cardiology

- Easy to learn and operate
- Intuitive and highly customized
- Less staff time required
- Improved reimbursement
- Easier scheduling and tracking of patients
- Responsive, friendly technical support
- Affordable solution
- ASP option available
